Export Summary

The export value of U.S. dairy, livestock, and poultry commodities and dressed hides and skins, including leather, totaled nearly $4.5 billion during calendar 1985, about 3 percent below the same 1984 period. Nearly all of the major commodity groups, such as red meats, animal fats and oils, hides and skins, leather, and poultry products contributed to the decline. Most of the decline resulted from a combination of decreased volume and lower unit prices, except for hides and skins, and poultry, eggs, and products for which the declines were due entirely to lower unit prices. Some of the export losses were offset by gains in the export value and volume of variety meats, live animals, and nonfat dry milk (NDM). The value of live animal exports for breeding increased nearly 100 percent and NDM gained 10 percent. Cheese and butter exports declined substantially, both in volume and value.

The projected value of calendar 1986 exports of dairy, livestock, and poultry commodities and dressed hides and skins is expected to rise slightly in 1986. Some of the major commodity groups which performed well in 1985, such as variety meats and live animals, are expected to remain about the same in 1986 in both volume and unit price. The export volume of NDM is projected to level off as the Section 416 program continues to mature. However, butter and cheese exports are expected to get a boost from new programs in 1986 which should help to push dairy product exports above 1985's levels in both volume and value.

Commodity Highlights

Red Meats - Exports of red meats (beef, veal, and pork) during calendar 1985 fell 8 percent in volume and 6 percent in value. Shipments to all destinations (over 80 countries) totaled 158,000 metric tons worth nearly $563 million. Beef and veal export volume dropped 2 percent while the value slipped 1 percent. Pork exports declined in volume and value, 22 and 33 percent, respectively. Japan continued to be the No. 1 market for beef and pork, accounting for about 60 percent of U.S. red meat exports. Canada and Mexico each have a 8-percent market share. These three markets accounted for over 75 percent of all red meat exports in 1985.

Variety Meats - Exports of pork, beef, and veal variety meats during 1985 totaled over 247,000 tons, up 14 percent, and had a value of $298 million, up 10 percent from 1984. Mexico, Japan, France, Egypt, the United Kingdom, and Canada were the top markets for U.S. variety meats, accounting for about 83 percent of the total by volume. Major volume increases were registered by Mexico, Egypt, and the United Kingdom. The EC market still accounted for approximately 35 percent of U.S. variety meat exports during 1985.

Animal Fats and Oils - Exports of these commodities totaled 1,327,451 tons worth nearly $602 million in 1985. Despite an increase of 2 percent in volume, value slumped 11 percent. Continued high U.S. production coupled with declining domestic demand for inedible tallow and grease resulted in record

BEST COPY AVAILABLE

stock levels and lower unit prices. The generally poor economic situation and resulting fiscal policies in our major markets continued to encourage shifts to alternative suppliers and products. There are no immediate prospects for improvement. If U.S. cattle and hog slaughter declines 3-5 percent, as projected, and if export demand picks up, there could be some strengthening in prices, particularly for inedible tallow.

Inedible Tallow - Exports of this commodity in calendar 1985 totaled 1,229,067 tons, valued at more than $545 million. Because of a decline in the unit price the export value was down 9 percent in 1985 from the same 1984 period despite the fact that 1985 volume was up slightly from 1984 levels. The top 10 markets accounted for nearly two-thirds of the export value even though 6 of the 10 showed a decrease in volume from 1984.

Egypt, at over $97 million, was the No. 1 market in 1985 with a market share of 18 percent, followed by Mexico at less than 9 percent. Others in the top 10 with their market share in parentheses included: the Netherlands (7.1); USSR (7.0); Korea (6.2); Colombia (4.1); Spain (3.8); Nigeria (3.5); Japan (2.9); and El Salvador (2.8).

Edible Tallow - Exports of edible tallow during calendar 1985 totaled 23,000 tons valued at nearly $10.7 million, a decrease from the same 1984 period of 6 and 16 percent, respectively. There are no prospects for improvements during the coming year unless other edible oils show marked price improvements.

Lard - Exports during calendar 1985 totaled 47,414 tons, valued at over $26.5 million. These totals represent an increase of 17 percent in volume and a decline of 9 percent in value compared with the same 1984 period. Mexico continued as the No. 1 market, taking 76 percent of total exports. Canada was second with a 9-percent market share, followed closely by Haiti with 7 percent. Prospects for Mexico to remain No. 1 in calendar 1986 seem probable despite the fact that Mexico increased its import duty on lard from 10 to 25 percent ad valorem effective July 25, 1985.

Cattle Hides - Whole cattle hide exports to all destinations (47 countries) during calendar 1985 totaled nearly 25 million pieces, valued at nearly $992 million. Fxport volume was unchanged, but the export value was 7 percent below the same 1984 period because the average price per exported hide declined 7 percent ($42.61 versus $39.75). The top 10 markets accounted for over 93 percent of the value of hide exports although six recorded substantial sales declines, ranging from $5 million to $29 million. Japan remained the top market, accounting for nearly 28 percent of the export value. Korea was a close second with a market share of 27 percent. Others in the top 10, with market share percentages in parentheses, were: Taiwan (11.8); Mexico (9.2); Italy (4.6); Romania (4.1); PRC (3.0); Canada (2.6); Yugoslavia (1.6); and Czechoslovakia (1.4).

BEST COPY AVAILABLE

A demand-related softness in hide prices, experienced during the fourth quarter of 1984, was reversed about midway through the first quarter of 1985. Since then there have been only minor swings in prices with some gains in late July and early August and a sharper increase in October. Prices in the fourth quarter of 1985 remained firm and finished the year above 1984 fourth quarter levels. Slaughter levels in 1986 are expected to be 3-5 percent below the 1985 level. Assuming continued export demand and further softening in the exchange rate of the United States against the major currencies, prices of hides should hold firm and possibly strengthen during 1986.

Pig and Hog Skin - Exports of pigskins during calendar 1985 declined dramatically from the same 1984 period. In 1985, export volume was only 3.4 million pieces, valued at less than $10 million, down 45 and 40 percent, respectively. Yugoslavia accounted for most of the declines in value and volume, taking about 1 million pieces in 1985 compared to 4.6 million during the same 1984 period. Yugoslavia, with a 31-percent market share, became the No. 2 export market, followed by Venezuela and Italy. The decline in Yugoslav imports was only partially offset by Mexico which took 1.7 million pieces and became the No. 1 market, with more than a 50-percent share. Pigskin exports during 1986 are not expected to show much improvement in volume, but the value may go up as U.S. suppliers cut back on production.

Leather - Exports of leather to all destinations (65 countries) during calendar 1985 totaled nearly $284 million, 9 percent below the same 1984 period. Korea, down $30 million from last year, accounted for nearly all of the decline. In fact, including Korea, 6 of the top 10 markets recorded sales declines of more than $1 million. The top 10 leather markets accounted for 88 percent of all U.S. leather exports. Korea was replaced by the PRC as the No. 1 market with a market share of 22 percent, followed by Canada with an over 16-percent share. Others in the top 10, with market share percentages in parentheses, were: Korea (15.6); Japan (7.4); Italy (6.7); Hong Kong (5.7); Taiwan (5.4); the Dominican Republic (3.2); Mexico (2.9); and the Philippines (2.3).

Upholstery Leather - Exports of this commodity declined 8 percent in volume, but increased 3 percent in value during calendar 1985 over the same 1984 period. Canada and Japan accounted for 99 percent of the nearly $48 million total. Canada's market share was 67 percent and Japan's was 32 percent.

Wet Blue - Exports of wet blue during calendar 1985 totaled more than $112 million, 4 percent over the same 1984 period. The PRC, up $22 million, accounted for the gain. All of the gains occurred in the unsplit (schedule B, number 1210515) category. Wet blue exports accounted for 40 percent of the total leather exported. The top five markets accounted for 86 percent of total wet blue exports. The PRC was No. 1 with a 54-percent market share, followed by Italy with 12 percent. The other three markets and their market shares were: Taiwan (8.1); Hong Kong (6.3); and Korea (5.4).

BEST COPY AVAILABLE

Pig Leather - Exports during calendar 1985 were down 13 percent in volume and 19 percent in value compared with the same 1984 period. The price per square foot averaged 72 cents in 1985, compared with the previous year's average of more than 77 cents. The top six markets (Canada, the Dominican Republic, the United Kingdom, Mexico, the Philippines, and Japan) accounted for more than 90 percent of the nearly $3.1 million total. Canada was the largest market with a market share of 28 percent.

Mohair - Exports of mohair during calendar 1985 totaled over 4,000 tons, valued at nearly $41 million—an increase of 5 percent in value and 16 percent in volume from the same 1984 period. Unit prices in 1985 averaged nearly 10 percent below the 1984 levels. The United Kingdom continued to be the most important market for mohair, accounting for 74 percent of total exports. Two other markets of major importance and their percent of market share were: Italy (8) and the Republic of South Africa (7).

Mink Pelts - Exports of mink pelts during calendar 1985 declined slightly in volume and value compared with the same 1984 period. Volume of "dressed and undressed" pelts in 1985 was 3,487,155 pieces, down nearly 2 percent. Value totaled nearly $103 million, also down 2 percent. Dressed pelts registered gains in volume and value, while undressed pelts showed just the reverse. Undressed pelts declined 7 percent in volume and averaged 30 cents less per pelt in 1985 than in 1984. Dressed pelts gained 11 percent in volume and averaged about 60 cents less per pelt than in 1984.

The top 10 markets accounted for 94 percent of the export value. Canada was the top buyer with a nearly 24-percent market share, followed by Switzerland with nearly 13 percent and West Germany with over 12 percent. Others in the top 10, with their market share in parentheses, included: Hong Kong (10.0); Korea (9.2); the United Kingdom (6.9); Greece (6.6); Japan (6.4); Italy (3.4); and the Dominican Republic (2.7).

Mink pelt production continues its slow, but steady climb. From a recent low of 3.5 million in 1980, the 1985 crop is estimated to have reached just over 4.3 million. No major price moves are anticipated until the foreign exchange ratios become more favorable for the top 10 importing countries.

Dairy Breeding Cattle - Exports of dairy breeding cattle during calendar 1985 totaled 45,174 head, valued at over $53 million--more than twice the number and nearly twice the value exported during the same 1984 period. Shipments to Mexico represented two-thirds of all U.S. dairy cattle exports as the Government of Mexico continued to provide incentives for dairymen to increase domestic production. Other top markets with their percent market share for volume include: Venezuela (10.4), Taiwan (5.6), El Salvador (3.9), and Canada (3.2).

Beef Breeding Cattle - Exports of beef breeding cattle in calendar 1985 totaled nearly 41,518 head with a value of over $49 million. These figures represent an increase of 179 percent in volume and 282 percent in value compared with the same 1984 period. Mexico accounted for 90 percent of total exports. The other major markets in ranking order were: Canada, 3 percent; Taiwan, 2 percent; and Ecuador and Venezuela at 1 percent each.

BEST COPY AVAILABLE

The average unit values were: $1,128 to Mexico; $588 to Canada; $1,164 to Taiwan; $1,619 to Ecuador; and $1,444 to Venezuela. Australia, a new export market for U.S. beef breeding stock, imported 142 head valued at nearly $10,000 per head.

Bull Semen - Semen exports to 60 countries totaled over $23 million in calendar 1985, down nearly $2 million from the same 1984 period. The EC continues to be the leading market, with a 40-percent market share. Individual countries showing significant gains over 1984 include: Mexico, West Germany, France, Brazil, and the USSR. Markets showing significant declines include: the Netherlands, Italy, Switzerland, Hungary, and South Africa.

Horses, Breeding - Exports of horses for breeding during calendar 1985 totaled 1,909 head, valued at over $19.2 million; representing an increase in volume and value of 14 percent and 10 percent, respectively, over the same 1984 period.

Markets with imports valued at over $500,000 were: Ireland, $4.7 million; France, $2.8 million; South Africa, $1.7 million; Sweden, $1.5 million; the United Kingdom, $1.5 million; Japan, $1.2 million; Mexico, $0.968 million; Finland, $0.825 million; and Italy, $0.514 million.

The average unit value of breeding horses exported in calendar 1985 was $10,090. The countries with the highest per-unit values were: South Africa, $291,666; Ireland, $226,904; and Japan, $133,409.

Swine - Breeding swine exports during calendar 1985 totaled 18,160 head, valued at $7.9 million. These figures represent an increase of 27 percent in volume and a decrease of less than 2 percent in value compared with the same 1984 period. Major export markets in 1985 were: Mexico, 4,618 head; Japan, 3,008 head; Venezuela, 2,461 head; Canada, 1,302 head; Korea, 1,297 head; and the PRC, 1,018 head. Mexico had 25 percent of the total market share; Japan, 17 percent; Venezuela, 14 percent; Canada, 7 percent; Korea, 7 percent; and the PRC, 6 percent. (The PRC imported 1,836 head in early December that are not presently shown in our 1985 export statistics.) Export declines were recorded for: Taiwan, Thailand, and Malaysia.

Poultry, Eggs, and Products - Exports of these commodities during calendar 1985 totaled nearly $384 million, reflecting an 8-percent decrease from the same 1984 period. Declines in export value were registered in all poultry meat categories, except whole broilers. Eggs and egg products also increased in total despite a decline in exports of eggs for hatching. Strong competition from other suppliers such as the EC, Brazil, and Hungary continue to impede U.S. exports of poultry meats along with weak foreign demand and the strong U.S. dollar. Chicken meat exports valued at nearly $202 million, of which more than $176 million were for chicken parts, accounted for over half of the total exports of poultry, eggs, and products. The following five chicken parts markets continue to account for approximately three-fourths of the exports: Japan, the No. 1 market, had a market share of over 27 percent; followed by Hong Kong (22 percent); Singapore (12 percent); Canada

BEST COPY AVAILABLE

(6 percent); and Mexico (6 percent). The Caribbean area accounted for 16 percent of the total value at nearly $28 million, a 6-percent increase compared with the same 1984 period.

Eggs and Egg Products - Exports of all classifications of eggs were up in volume and only hatching eggs reflected a lower net value due to competitive prices from other countries for breeding stock and a shift in the mix of breeding stock and hatching eggs for production flocks. Movement of shell eggs for table use was up 6 percent in volume and 3 percent in value with Hong Kong and Canada continuing as our major customers representing 67 percent of the export value. Egg product exports during calendar 1985 were 47 percent higher in value and 55 percent higher in volume. Japan and Canada accounted for approximately 90 percent of the trading. Japan continues to be our No. 1 customer with purchases totaling $17.3 million or 81.5 percent of total sales.

In 1986, exports of poultry, eggs, and products are projected to be at or slightly below 1985 levels in both volume and value.

Dairy Termination Program

Objective--The objective of the "Dairy Termination Program" (DTP) in the 1985 Farm Bill is "to encourage the adjustment of milk production to levels consistent with the national demand for milk and milk products." The target is to reduce milk production by 12 billion pounds a year or about 8 percent of current annual production. Every commercial milk producing entity within the 48 contiguous states is eligible for the DTP.

Incentive Payment--The incentive to terminate production is a payment based on the producer's history of milk marketings and the bid offered by the producer to cease this production.

Whole Herd Disposal--The DTP gives dairy producers the opportunity to terminate milk production and dispose of their whole herd by selling for slaughter or export all the female dairy cattle in which they have a financial interest.

Signup--From February 10 through March 7, 1986, dairy producers may submit bids to enter into a contract.

Notice of Acceptance--By mid-March 1986 the bids received at all of the county Agricultural Stabilization and Conservation Service (ASCS) offices will be sent by express mail to Washington, D.C., for summary and evaluation. By March 28, 1986, each accepted bidder will be notified by certified mail. All producers whose bids have not been accepted will also be notified as soon as possible.

Contract Period--Herd disposition will take place over an 18-month period. Program payments will be made over a 5-year period, beginning after disposition of the herd. The contract cannot be withdrawn by the producer after it has been accepted by the Commodity Credit Corporation.

BEST COPY AVAILABLE

Producer Responsibility--If a producer's bid is accepted, the producer may not:

1) engage in the production of milk for commercial use for 5 years;

2) acquire or retain any interest in dairy cattle or the production of milk;

3) acquire any milk production facility that becomes available because of the DTP; or

4) make available any milk production facility to any person for the purpose of producing milk.

The producer may sell milk production equipment such as bulk tanks or milking machines with no restrictions.

Bid Basis--Those interested in participating in the program may submit a dollars-per-hundredweight-milk bid, based on their base period milk marketings, as adjusted if appropriate. They must offer evidence of the size and composition of their dairy herds (cows, heifers, and calves) for three dates: January 1, 1985; January 1, 1986; and on the date that the bid is submitted.

Milk Base--The producer's base period milk marketings will be the lesser of the commercial milk marketings in two 12-month periods--the one beginning July 1984, the other beginning January 1985. Bids will be evaluated based on production during the base period and not on prospective production; there will be no upward adjustments. However, changes in the size and composition of a producer's dairy herd may result in a reduced contract base. For example, the preliminary base will be adjusted by reducing that base for any dairy cattle that were transferred off the unit for purpose other than slaughter or export on or after January 1, 1986.

Disposal Periods--Producers must submit bids for one or more of the following "disposal" periods:

1) April 1-August 31, 1986;
2) September 1, 1986-February 28, 1987; and
3) March 1-August 31, 1987.

Disposal periods represent the times during which producers contract to dispose of their female dairy cattle through either slaughter or export.

Sale and Slaughter--Dairy cows and breed heifers sold by milk producers for slaughter must be slaughtered within 15 days from the date of sale, but not later than the final day of the contract disposal period. Other dairy cattle such as unbred heifers and calves sold for slaughter must be slaughtered within 6 months from the date of sale, but not later than the final day of the contract disposal period--except that for the initial disposal period, such slaughter must occur no later than September 30, 1986.

Certification--The contracting producer's dairy cattle must be branded as specified by the USDA.

BEST COPY AVAILABLE

With the sale of the cattle, the producer must certify the following information on forms provided by the county ASCS office: head of cattle by type (cows, heifers, and calves); date of sale; weight; and price received.

Certifications must be signed by the seller, the buyer, and the slaughterer or exporter of the dairy cattle.

Sales receipts and Animal and Plant Health Inspection Service health certificates will be required as proof of export to all destinations except Canada and Mexico. For those border countries, sales receipts and inspection reports from the Canadian or Mexican Government or U.S. Customs will be required.

Payments--Successful bidders will have several options for the timing of cash payments:

1) equal annual payments, or;

2) no payment for the first year. Thereafter, the producer has the option of equal annual payments or a payment not to exceed 85 percent of the contract amount for the second year, with the remainder of the payment made equally in annual payments, or;

3) payment in the first year not to exceed 80 percent. Thereafter, the remainder paid in equal annual installments.

U.S. Aquacultural Activities - An Update

A January 20, 1986, meeting of U.S. aquaculture interests held in Reno, Nevada, at the "World Aquaculture Conference-'86," resulted in the technical formation of a U.S. Aquaculture Marketing Council (Council). The Council is now seeking incorporation with plans to base its home office in Little Rock, Arkansas. To date the Council includes the U.S. trout, crawfish, and tropical fish industries. Additional meetings are scheduled for membership discussions regarding other U.S. freshwater fish interests and the Council's role in domestic/export market development.

Participants at the Reno meeting also included members of two FAS-sponsored market survey missions which occurred in the fall of 1985 to Europe and the Far East. U.S. aquaculture industries represented on those two missions included: catfish, crawfish, trout, salmon, tropical/ornamental fish, and shellfish (clams/oysters). The mission's intent was to review market opportunities for U.S. aquaculture products in select countries and determine to what extent present U.S. aquaculture interests could work together under an umbrella type organization, wherein funding, administration, and marketing duties would be combined for greater efficiency.

PRC Fur Auction in Hong Kong

The PRC held its second furskin auction in Hong Kong during January 18-21, 1986. The first auction was in February 1985. The auction was again sponsored by the China National Products and By-Products Import Export Corporation. The pelts were graded by a Danish firm. Invitations were sent to buyers in Japan, Hong Kong, the United States, Italy, the United Kingdom, and other European countries. The leader of the PRC delegation told reporters that prices were generally lower than in 1985.

A total of 450,000 mink and 3,000 raccoon pelts were sold. The total value of the sales was not published.

A PRC representative told reporters that in 1985 the PRC exported 2 million mink pelts valued at $38 million. Exports in 1986 are expected to be about the same as in 1985.

The second sale in 1986 is scheduled for April. Most of the buyers at the January auction were from Hong Kong. They considered the Chinese pelts of lower quality than U.S. or European skins, but on par with those from the USSR.

In 1985 the PRC was the largest supplier of mink pelts to Hong Kong with a 35-percent market share followed by: Denmark (23); Finland (11); the United Kingdom (9); the USSR (8); and the United States (6).

Section 416 Program Update

During fiscal 1986 (October 1, 1985-February 5, 1986), signed commitments to donate U.S. dairy products under Section 416 totaled nearly 19,000 tons. Nonfat dry milk accounted for 46 percent of the donated dairy products, followed by cheese at 40 percent, butter at 6 percent, and butteroil at 4 percent. These donations are designated for shipment to four countries (table 1).

When considering projections for the entire fiscal 1986 year the total commitments under the 416 Program could exceed 200,000 tons. These include signed agreements as well as proposals in their earliest stages. If that 200,000-ton level is reached, NDM is expected to account for 65 percent followed by UHT milk, cheese, and butteroil at 12, 11, and 11 percent, respectively. Butter will account for the least, about 2 percent.

Table 1--Signed Agreements for Donated Dairy Products Under Section 416

Market Opportunities

Belgium Confirms End to Three-Kilo Restriction--Belgium announced that it will accept meat shipments from the United States in pieces of over 100 grams.

The significance of this change is that the United States is now free to sell portion-controlled meat in the Belgian market which will facilitate utilization of the high-quality beef quota.

MAFF Announcement of Second Half JFY 1985 Beef Quotas--The Japanese Ministry of Agriculture, Forestry, and Fisheries (MAFF) announced on November 21 beef import quota levels for the second half of JFY 1985. The combined amounts of the various quota categories total 79,000 tons, bringing the total quota tonnage for JFY 1985 to 159,000 tons in accordance with Japan's commitment for JFY 1985.

Beginning with the second half of JFY 1985, the MAFF has established a new quota category called "demand development quota" (DDQ). It is one of five "special" quota categories, the others being Hotel, Okinawa, School Lunch, and Boiled Beef. The DDQ is designed to be used to facilitate promotion of imported beef.

Demand development quota users will be required to submit imported beef promotion plans to the MAFF in order to obtain quota allocations for this category. Actual imports will be undertaken by the traditional 36 licensed importers. Japan's per capita beef consumption is only 4.2 kilograms so the availability of beef exclusively for promotion purposes could strengthen demand for imported U.S. beef if the program is implemented effectively.

This quota category is separate from and in addition to the special embassy beef promotion quotas.

All DDQ imported beef will be subject to the usual 25 percent ad valorem tariff. In addition, as in the cases of the hotel quota and private trade portion of the general quota, beef imported under the DDQ will be subject to surcharges payable to the Japan Meat Conference whose function is to promote meat consumption in Japan.

The MAFF envisions two principal programs: 1) international events such as international fairs and import bazaars; and 2) country centered events such as "American Week" at supermarkets.

At the average import price of $5,000 per ton for U.S. high-quality beef, potentially $4 million worth of U.S. beef could be promoted under the DDQ as a result of the 800-ton allocation for the second half of the Japanese fiscal year.

Saskatchewan Plans to Dramatically Increase Hog Production--The Saskatchewan Government recently announced an investment agreement with Gainers, Inc. of Alberta which will more than double provincial hog production and processing. Gainers, Inc. with substantial government support, expects to construct three processing plants within the next 5 years. Both parties expect hog production to increase from the current level of 800,000 hogs to 1.8 million hogs.

BEST COPY AVAILABLE

If provincial producers can meet Gainers', Inc. production goals, the company expects to sell its processed pork to eastern Canada and the United States. The company has purchased plants and distribution networks in the United States from which it would market its product.

The Saskatchewan Government's commitment to increase hog production through incentives to local producers could increase pork exports to the United States significantly.

Taiwan--A recent report has indicated that there currently is an active market in Taiwan for dairy cattle and, more recently, beef cattle. Over 2,000 head of dairy cattle and 750 head of beef cattle were imported from the United States in calendar 1985. The outlook for 1986 is that dairy imports will continue at this level and beef cattle imports may increase.

Swine to the PRC--In December 1985, a U.S. exporter airshipped 1,836 head of breeding swine to Guangzhou Province, PRC. This was the largest single shipment of breeding swine from the United States in recent history. About 60 animals (3 percent) had to be disposed of due to various disease and stress factors. The balance of the shipment is reportedly doing well.

Leather to Korea--In 1983 and 1984 Korea was the No. 1 export market for U.S. leather, taking $70 and $74 million, respectively. In 1985 Korea dropped to $44 million, becoming No. 3. The reason for this drop was not because of an increase in tanning capacity or decline in leather use.

Since 1974, Korean leather goods exports increased from less than $100 million to over $1 billion and Korean leather manufacturers rely on imports for 60 percent of their leather needs. This suggests that Korean leather goods producers are getting more of their leather needs from Japanese, South American, and European suppliers. If U.S. suppliers hope to recapture an increased share of the Korean market, the Tanners' Council of America (TCA), Inc., and its members must become more active in that market. The U.S. Agricultural Counselor in Seoul has suggested that the TCA begin increasing its efforts this fiscal year.

Horses to Argentina--On February 19, the USDA announced $800,000 in GSM-102 credit guarantees for the purchase of U.S. horses for breeding. Private buyers in Argentina made the request, and if exports are successful this year, we would expect this market to grow in future years.

Market Development Activities

A. Planned:

The USMEF to Open Office in Caracas--On March 14, 1986, the U.S. Meat Export Federation (USMEF) will officially open an office in Caracas, Venezuela. This regional office will have foreign market development activity responsibilities for Central and South America. The USMEF currently has overseas offices in Hamburg, Singapore, and Tokyo. The office will be located within the U.S. Agricultural Trade Office.

BEST COPY AVAILABLE

Mohair Team to the Far East--A three-member team representing the mohair industry will be contacting buyers and users of mohair in Japan, Taiwan, and Hong Kong to capture a larger share of those markets. Currently most of the mohair used in those countries is supplied from South Africa. The United States has made some gains in the Japanese market in recent years through repeated trade calls.

Food and Hotel Asia '86 Trade Show--The USA Poultry and Egg Export Council will be represented at this upcoming show. The exhibition will feature food, drink, and equipment for the hotel, restaurant, and catering trade. The show, scheduled for May 13-16, 1986, in Singapore, is expected to attract buyers from the entire Southeast Asian region.

Market Development Activities

B. Concluded:

Mohair Council of America in Europe--A 4-person team during a 2-week period in October 1985 contacted 15 textile manufacturers (4 in Norway and 11 in the United Kingdom) that buy and/or use mohair in their production. In addition, the team spent 2 days at the "54th Interstaff International Trade Fair for Clothing Textiles" held in Frankfurt, West Germany, with over 1,100 exhibitors from 42 countries. The team also contacted FAS Embassy representatives in each country visited. The team met with several current buyers of U.S. mohair. They also met with many more that are potential customers who either buy directly or in semiprocessed form (tops, yarn, etc.). The trip resulted in several new trade contacts and new information for potential future market opportunities.

TCA in Mexico--The Tanners' Council of America (TCA), Inc., under joint sponsorship with FAS, participated in the ANPIC Leather Exhibit in Leon, Mexico, during February 22-25, 1986. There were a total of 15 U.S. tanners that exhibited at the show. This was the first opportunity for U.S. tanners to participate in the ANPIC Leather Exhibit because in previous years foreign exhibitors were not allowed participation.

At the conclusion of the exhibit, the TCA conducted a one-day seminar in Mexico City on the merits of U.S. leather and the advantages to the Mexican shoe manufacturing industry if better access into Mexico for U.S. leather is allowed. Participants in the seminar included U.S. tanners, shoe importers, shoe manufacturers, U.S. Embassy staff and Mexican Government officials.

Market Access Issues

Canada Extends Determination Ruling of Countervail Investigation into EC Beef--Canada has extended the date for a preliminary ruling of a countervailing duty (CVD) investigation into imports of boneless manufacturing beef originating from the EC. The case was launched in response to a complaint filed by the Canadian Cattlemen's Association in October 1985. Ongoing negotiations with the EC to limit beef exports to Canada may result in an agreement that will nullify a CVD ruling.

BEST COPY AVAILABLE

On January 16, 1986, the day that the Deputy Minister of Customs and Excise of Revenue Canada was to make a preliminary ruling on injurious subsidization of manufacturing beef imported from the EC, the Deputy Minister extended his finding date 45 days.

Options are: 1) to find that imports under investigation are not injurious and terminate the CVD procedures; 2) to accept the EC offer on grounds that it would eliminate injury and suspend the CVD procedures; or 3) to proceed with the CVD case and announce a preliminary countervail duty.

If the Deputy Minister decides to accept an EC offer, any single affected party (i.e., the petitioner, meat importer, meat exporter, etc.) may formally request rejection at which time the Deputy Minister is obligated to proceed with the CVD case and make a preliminary ruling.

Mexico--Effective January 24, 1986, import tariffs on:

1) 02.01.A006 (new code), pigskins, whole or cut, chilled or frozen, when used for production of gelatins or proteins will be 10 percent, and requires an import permit;

2) 02.01.A005, pigskins, whole or cut, chilled or frozen, remain at 25 percent (this category includes skins for chicharron or fried pork fat) and effective February 19, 1986, does not require an import permit;

3) 15.08.A003 (new code, product used mainly in paints, varnishes, etc.), animal or vegetable oils, epoxied, is 25 percent; and

4) 23.07.A011 (new code) prepared concentrates for balanced feed is 5 percent.

Korea Announces Continued Ban on Beef Imports in 1986--In an attempt to raise domestic cattle prices, Korea has announced new measures, including the continued suspension of all beef imports through 1986 and a greater effort to export beef and cattle to Japan. Before Korean beef imports were suspended in 1985, the United States exported beef valued at $6.4 million; exports to Korea were valued at $8.0 million in 1984. Korean sources indicated that 5 tons of beef were exported to Japan during November 1985, but Japanese sources deny that the trade took place. The export of about 2,000 head of cattle for slaughter is under negotiation with Japan for delivery this spring, but price remains a barrier to closing the deal.

Pollution Control in Hong Kong--On December 27, 1985, the Government of Hong Kong, according to local newspaper reports, proposed a plan to control pollution caused by animal waste. If approved the plan will be implemented in three phases, starting in 1987, with expectations of being fully implemented by the mid-1990's. Over 100,000 hogs, 560,000 chickens, and 1,350 farms will be affected in the initial phase. Many pig and poultry farmers will probably be driven out of business because increased operational costs will make it impossible to compete in price with imports. Frozen pork and poultry products from the United States and other sources may be able to benefit through the expansion in imports.

BEST COPY AVAILABLE

New EC Beef Export Initiative--The EC has announced new export measures designed to aid in the disposal of a portion of the 730,000 tons of beef currently in EC stores.

This results in lowering the price for sales from intervention by about 15 percent--from $1,237 per ton to $1,024 per ton for forequarters and from $2,136 per ton to $1,825 per ton for hindquarters. The export price can be derived from these intervention selling prices by subtracting the normal export subsidies. Subsidies vary somewhat by destination, but on the average they will bring the selling price down to $365 per ton for forequarters and $712 per ton for hindquarters.

Selling prices under this scheme are not quite as low as those under the special scheme introduced last fall for sales to the USSR and Eastern Europe. Under that scheme about 215,000 tons are reported to have been sold, but the new regulation has the advantage of having no minimum quantity requirement.

The new measure applies to a wide range of destinations but is aimed especially at the rather small North African and Middle Eastern markets.

EC Agrees to Ban Hormones as of 1988--On December 19, 1985, the EC voted by a qualified majority for a total ban on the use of hormones for non-therapeutic purposes in livestock raising as of January 1, 1988.

The United Kingdom will not have to comply fully with the ban for an additional year, i.e., until January 1, 1989. The formal adoption of the ban will now be accomplished through the EC Council written procedure process, with all formalities due to be completed by December 31, 1985.

FAS Circulars: Market Information For Agricultural Exporters

As an agricultural exporter, you need timely, reliable information on changing consumer preferences, needs of foreign buyers, and the supply and demand situation in countries around the world.

The Foreign Agricultural Service can provide that information in its commodity circulars.

World agricultural information and updates on special FAS export services for the food and agricultural trade all are available in these periodic circulars.

For a sample copy of these reports—which can supply you with the information you need to make sound business decisions—check the box indicated, fill out the address form and mail it today.

To subscribe: Indicate which publications you want. Send a check for the total amount payable to the Foreign Agricultural Service. Only checks on U.S. banks, cashier's checks, or international money orders will be accepted. NO REFUNDS CAN BE MADE.
